

You are searching for a new challenge and want to take an active part in the collaboration of our innovative product? For an immediate start in our office in Munich, we are searching for a motivated and engaged

Senior QA Engineer (m/f)

crossvertise is a tech start up based in Munich, Germany. We're revolutionizing the way companies and agencies book advertising media.

For the first time ever we make it possible to book 90%+ of all advertising spaces available in Germany directly online. This includes ads in newspapers & magazines, TV, cinema & radio spots, out-of-home media (e.g. billboards), online and mobile ads. In our opinion, booking advertising media should be as easy as buying a new pair of shoes.

Job Description:

Your job will include:

- Create and maintain a full test suite of both automated and manual test plans for our web application and our data integration processes
- Lead structured application tests and evaluate the results
- Continuously monitor and profile our application to identify bottlenecks and improvement potentials
- Improve our automated build processes
- Work closely together with the engineering team to enhance our application towards greater testability and robustness

You will work in an international, dynamic and highly motivated team based in the city center of Munich. We offer you access to the latest and best technologies and tools in the .NET world (we are Microsoft Gold Partner).

Besides an attractive remuneration you will find short decision paths, flexible working condition, and much room for creativity and clever solutions. And of course we regularly have some fun together besides the work – from game nights, over skiing to visiting the Oktoberfest.

Skills and Requirements:

- Positive attitude, get fun out of finding elegant solutions and team spirit
- Willingness to take responsibility for your work and the quality of our software
- Experience with setting up test processes and configuring build servers
- Experience in various testing methods including unit testing, integration testing, load testing, structured manual testing with commonly used tools
- Experience with issue trackers (e.g. Jira) and source control (we use Git)
- Experience in C# or another programming language is a plus
- Good English and basic German skills required

Interested? Then we look forward to your application! We appreciate any references from previous employers, open source contributions, work samples or community profiles.
